

## **E- Safety – A guide for parents.**

**The Internet and Digital world has many advantages, but poses many risks to our young people. Read this to make sure you know how to keep your child safe.**

### **An introduction**

Increasingly there are more opportunities for children to get online – at home, at school and through their mobile phones and games consoles.

The internet can be of great benefit to your child. It can help them with their homework and it can help them to make new friends.

The internet can also **pose risks** to your child. It is important to be aware of the dangers and to know how to keep your child safe online.

### **Understanding the internet**

You may feel your child knows more about the internet than you do and find the idea of using it yourself a bit daunting. To keep your child safe it's important that you have an understanding of the internet, how your child uses it and the terminology used online.

Your child may be able to show you what they do and how it works or your local library, college or community centre may run classes on computers and the internet.

***We are hoping to run some e-safety guidance training for parents in the near future. If you would be willing to participate please contact school and ask to speak with Miss Brownrigg, or any of the Heads of House.***

### **What are the risks to children?**

Accessing the internet and using mobile phones can put children at risk of:

- seeing disturbing information or images
- being the victim of online bullying (also known as **cyberbullying**)
- being contacted and manipulated by an adult for sexual purposes (**also known as grooming**)
- sharing personal and identifying information with strangers
- sending or **receiving sexually explicit films**, images or messages of themselves or others (this is known as **sexting** when sent by mobile phone).

### **Keeping your child safe**

To help keep your child safe online:

- talk to your child about the dangers posed by the internet

- tell them what they should do if they become worried or concerned
- explain that anything shared online or by mobile phone could end up being seen by anyone
- understand what your child does online and know which websites they visit
- put the computer where the whole family can see it, not out of sight in a bedroom
- use filtering software to block inappropriate sites
- encourage your child to use websites such as ChildLine where they can find advice and guidance on safe (but fun) use of the internet.

**Where to find more advice – further support and guidance can be found on the school website or at any of the agencies below**

NSPCC: Advice and support for adults concerned about a child

CEOP: Organisation that works to stop child abuse on the internet.

Know-IT-All: Information on benefits, risks and safety on the internet.

DirectGov: Guide for parents on internet safety.

Which?: Information and advice on child internet safety.

Click Clever, Click Safe: Code developed by the UK Council for Child Internet Safety
